

System Level Design for CCTV Camera Power Supply Application

System Level Design Highlights

- Run multiple CCTV cameras from one power supply
- No DC power disruption worries with parallel power supply module configuration in redundant power supply system
- Connecting one of the AC inlet to a dormant backup power generator gives new meaning to backup power supply system
- Remote monitoring for DC voltage
- Rugged 19" rackmount chassis

Typical Applications

- Closed-Circuit-Television security environments
- CCTV Crime prevention and safety applications
